

IX.3.0B-SYSTEM-UEROR SUBROUTINE UEROR

Description

Subroutine UEROR keeps track of what pages error messages are written and the number of lines written by the error message.

This routine should be called before the error message is written.

The format of the error message should begin as follows:

```
FORMAT ('+*** ERROR - ...')
```

Calling Sequence

```
CALL UEROR (NUNIT,NLINES,NUMERR)
```

Argument List

<u>Argument</u>	<u>Input/ Output</u>	<u>Type</u>	<u>Dimension</u>	<u>Description</u>
NUNIT	Input	I*4	1	Unit number
NLINES	Input	I*4	1	Number of lines written
NUMERR	Input	I*4	1	Number of times routine UEROR has been called <u>1/</u>

Notes:

1/ Should be initialized to zero before first call to UEROR. If -1 is passed then the number of times UEROR has been called will not be updated.
